

## PRIVACY PATHWAYS at the IAPP

### Introduction:

The Privacy Pathways program reflects the IAPP's (the International Association of Privacy Professionals) mission of growing the profession. With the goal of helping to support those students studying privacy to further establish themselves in privacy space, the IAPP offers a unique opportunity to earn one of the following credentials -- the CIPP/US, CIPP/E, CIPM or CIPT. Additionally, as a Privacy Pathways student, you receive a discounted student membership to our research and publications, online training, practice exams, and a computer-based test. By offering this program to students, our goal is to help create an on-ramp to the privacy profession.

### Program Details:

Each student who participates in the program will receive for \$140 (full retail value is greater than \$1,700):

- One-year (twelve month) IAPP "Privacy Pathways" membership
- Complete access to IAPP online training and any appropriate e-books for the selected certification (CIPP/US, CIPP/E, CIPM, or CIPT) during the Privacy Pathway membership year
- One Computer-based Exam Voucher appropriate for the selected certification

Should a student fail their exam, one retake exam can be purchased for \$90 during the Privacy Pathways membership year. Students must contact IAPP to receive the special discount for the first-time retake. Second retakes, additional certification exams, and any designation sought during or after the Privacy Pathways membership year are full price.

### Mechanics:

Students will communicate their interest in participating in the program with their academic contact. Once the IAPP has received the interested students' information, the IAPP will communicate directly with student about their enrollment and how to pay their invoice. *The student's one-year Privacy Pathways membership will commence at that time (as of the first of the month)*. Students will thereafter receive access to the online training, any applicable textbooks, and will be able to schedule their exam via under the "My Purchases" section of their MyIAPP account.

### Important information for students:

Invoices must be paid right away; they expire three months from issue. Failure to pay immediately will result in the potential loss of membership months because membership begins at the time the Pathways package is created in the MyIAPP account. Students have one year from invoice to take or schedule the exam. The exam can be rescheduled anytime online up to 48 hours before the start of the test. Cancellation or rescheduling within 48 hours of the computer-based test result in forfeit of exam fees. Students are encouraged to schedule and take their IAPP exam early in the Privacy Pathways membership year so that they have time, if necessary, to pay for and schedule their one retake at the \$90 Pathways rate during that year.
